

## Meeting

### **Ozone Modeling Review Panel**

**Wednesday, December 10, 2003**  
**12:30 – 3:30 p.m.**  
**Chamber Building**  
**1445 Market Street, 4<sup>th</sup> Floor Board Room**

### Agenda

- I. **Introductions and Overview** (*5 min.*)
- II. **Update on Ozone Modeling to Support Denver 8-hour Ozone Early Action Compact and 2007 Control Strategy Evaluation** (*90 min.*)
  - Ralph Morris, Environ International Corporation, will discuss the 2002 base case modeling evaluation for SIP use, and the 2007 base case and control strategy evaluation and analysis.
- III. **Control Strategy Implications of Uncertainty in Base Case Modeling** (*15 min.*)
  - Jana Milford, Ph.D., University of Colorado will present data for other regions of the country which address uncertainty in base case ozone modeling and uncertainty in estimates of the effectiveness of VOC or NO<sub>x</sub> controls
- IV. **Precursor Emissions Inventory** (*30 min.*)
  - Kevn Briggs, APCD staff, will present information relative to the protocols and control and growth assumptions applied in inventory development.
- V. **Next Steps in the Modeling Process** (*30 min.*)
  - Mike Silverstein, APCD staff, will present proposed additional sensitivity screening runs and lead discussion considering the next steps in the use of the modeling process to aid in the understanding of ozone formation in the Denver region.
- VI. **Upcoming SIP Schedule** (*10 min.*)
